PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 8+ years of experience specializing in multi-tenant SaaS platforms for the insurance industry, built on C#/.NET, Angular, SQL Server and Azure. Built and run in production a platform serving 5 tenants and ~700 users, including a dynamic query engine that replaced 20+ manual reports and an Azure Synapse pipeline processing ~1.9M rows a day. Strong in system design, event-driven workflows, CI/CD with Azure DevOps, and daily delivery with AI coding agents.

TECHNICAL SKILLS

Programming Languages: C#, TypeScript, JavaScript, SQL, Python, Java

Frameworks & Libraries: .NET, ASP.NET Core, Entity Framework Core, ABP Framework, Angular, React, Vue

Cloud & DevOps: Azure (Synapse, Functions, App Services, Blob Storage, Queues), Azure DevOps, CI/CD, Git

Databases & Tools: SQL Server, Stored Procedures, PostgreSQL, Cosmos DB, REST APIs, Adobe Sign, DocuSign, Jira

Methodologies: Multi-Tenant Architecture, Commands & Events, Asynchronous Processing, Layered Architecture, Agile/Scrum, Code Review, AI-Assisted Development

Spoken Languages: English (Fluent), Spanish (Native)

PROFESSIONAL EXPERIENCE

Senior Full Stack Software Engineer **2020 – Present**
Trulydata *Remote*

- Engineered a Custom Views engine that generates database queries dynamically from views users define in the UI, replacing 20+ manual reports and powering data-heavy screens.
- Re-architected the analytics ETL from Spark Mapping Data Flows into a single parameterized Azure Synapse pipeline with automated scheduling and per-tenant retry, now loading ~1.9M rows (~0.5 GB) a day.
- Owned development of a multi-tenant insurance platform (C#, .NET, Angular, EF Core, SQL Server, Azure) serving 5 tenants and ~700 users in a team of three, with tenant isolation through role-based access, permissions and Azure authentication.
- Integrated Adobe Sign and DocuSign into Azure-based document generation, and shipped a configurable agent-recruitment platform with digital signatures that adapts to each agency's requirements.
- Designed business workflows on Commands & Events for traceable, asynchronous critical operations; ship through Azure DevOps CI/CD, mentor part-time developers, and deliver daily with AI coding agents.

Freelance Software Developer **2018 – 2020**
Self-employed *Remote*

- Delivered web platforms and Android apps for photography studios using React, Angular, Vue, Django, Python, Java and PostgreSQL.
- Automated file management with a Telegram bot built on the Moodle API.

EDUCATION

B.Sc. in Software Engineering **2018 – 2022**
University of Holguín *Holguín, Cuba*
Thesis: Public Key Infrastructure (PKI) built on EJBCA.
